

# Integrated Switch Router

Incorporate the ALL.SPACe terminal into your LAN and WAN environment with an optional integrated fully-managed non-blocking L2/L3 gigabit ethernet switch. Seamlessly manage and optimize your traffic across all satellite and cellular links while also simplifying LAN and sub-LAN architecture and policy. The optional L2/L3 switch installs in a modular bay, and supports ethernet web monitoring and configuration as well as SNMP for management and control.

## Switch Router Capabilities

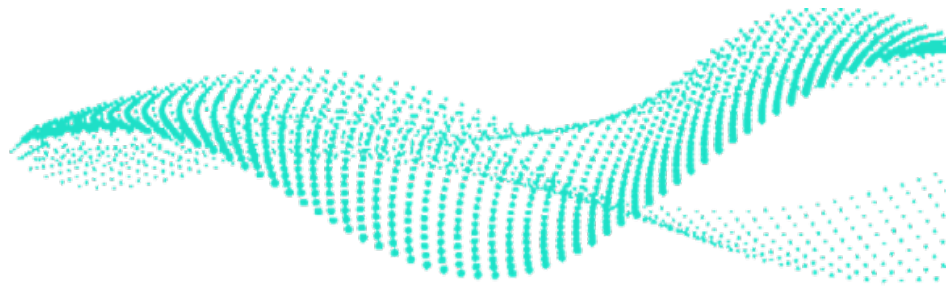

### Key Capabilities

Fully-managed Layer 2/3 non-blocking Ethernet switch  
IPv6 Support  
Gigabit ethernet  
SNMP & Web management interfaces

### Interfaces

5x 10/100/1000 Ethernet ports  
DHCP server & NAT support  
Link Aggregation  
VLANs (802.1Q)  
QoS (IEEE 802.1p)  
Spanning tree (802.1D, 802.1W)  
Flow Control (802.3x)

IPv4 & IPv6 routing features: ARP, ICMP, OSPF, RIP, VRRP, DVMRP
